Opus Series

## #CLOXP

The light engine efficiency of the Cameo OPUS X Profile Moving Head (item no.: CLOXP) can be seen throughout its design philosophy. This makes it possible to achieve 33,000 lm at a lighting power of 72,000 lux @ 5 metres. The complete setup with effects for use as spot and profile in this efficient and modern moving head is further augmented with the additional framing module. The high-quality optic with 170 mm front lens and a remarkably wide zoom range of 6° to 48° offers almost inexhaustible design possibilities. Be inspired by the combination of CMY colour blending and an additional colour wheel with 6 dichroic filters. Cleverly coordinated and balanced functional features facilitate consistent projection without hotspots. The moving head is equipped with a +/- 45° rotatable, four-blade framing-shutter-system. Flickering in camera images is reliably prevented thanks to selectable PWM frequencies of up to 25 kHz. Light designers appreciate the rotatable animation wheel that doesn't limit their creativity. Fascinating lighting effects are created with the rotating gobo wheel in combination with six indexable, rotatable and exchangeable glass gobos, or optionally open. Alternatively, the static gobo wheel is available with seven exchangeable glass gobos or for open application.
