

VideoDeck 6.25mm

xVision VideoDeck Series

#XVVF-P6.25MM

Featuring a completely new dimension to set design and content creation: The xVision VideoDeck LED system enables designers to use the stage itself as part of the video display system. Its high strength rubberized facade allows high weight items, such as cars or set pieces, to be placed on top of the unit while delivering exceptional contrast with deep blacks, a feature too often overlooked on many similar products. A clever touring frame with built-in levelling system allows for quick and effortless installation in any environment. Target installations include car shows, live TV broadcasts, talent performances and museums/showrooms. The xVision VideoDeck LED is packaged to be a road-ready system but is at home on any permanent installation as well.
