

VD-251X

Theatrix

#VD251X

Built to withstand the daily hazards of touring, this VD-251X Theatrix Electrical Distribution features an impressive amount of options for such a small format. The front panel is cut from a thick 3/16" aluminum sheet and is fixed to a robust steel chassis with rear support. It also features a handle protection over the Main Breaker switch. All circuit breakers can be installed recessed with the addition of acrylic spacers for protection (optional). This type of power distribution is specifically designed to be used with xVision Video panels. It offers 24 separate 208V** circuits on 4 X Socapex connectors and 3 X 20A Edison Duplex (5-20) over a 200A 3 phases Main Breaker. Each Circuit 5 & 6 of the Socapex is doubled on a XVT3 Female connector. Panel mount terminals and neon indicators allow quick and easy voltage checks. It also features a 1 to 3 phases selection located on top under an easy access trap door.
