

Edge Bezel for UHD series

xVision Install Series

#4452-3402/4452-340

3

Horizontal and vertical edge bezel are accessories for UHD install LED wall. Since they are modular, those panels do not have closed frames. Once the screen is assembled, the vertical and horizontal bezels are placed on the ends of the screen to hide the open sides and panel brackets. The final result gives a seamless, modern and sleek appearance to the LED wall. The Horizontal and vertical edge bezel are compatible with the entire Install UHD series.
