RCU 300

Event Controllers

#RCU300

Rack mountable master control unit for creating system solutions for large-scale video walls applications.

Key features

Full control over the LiveCore series image processors (up to 24 chassis)

Manages up to 96 video outputs and up to 576 layers (192+ Megapixels)

Configuration and control via proprietary embedded software

Matrix switch control

Up to 200 layout presets

Macros – Network commands to any IP controllable device

Remote operations capability via VNC

Extremely reliable, adapted to 24/7/365 applications

2RU rackmount chassis – slide rails kit included

Redundant, hot-swappable power supplies

2 separate gigabit Ethernet network interface connections

LED indicators and audible alarm notification for system fault detection

TCP API for remote control – AMX and Crestron drivers supplied

6 x rear USB ports and 2 x front USB ports

External pointing device and QWERTY keyboards supported over USB

Large scale System Solution

RCU300 will enable you to combine and control multiple Analog Way image processors and switchers to create a large-scale system solution for video wall applications that require a large amount of inputs, outputs and layers.

Unleash the power of LiveCore

The RCU300 will unleash all the scaling horsepower underneath the hood of the LiveCore series. Maximize the capability of your Analog Way image processing by using the RCU300 to control and configure your solution. Control up to 96 outputs with up to 576 seamless layers! Create huge video canvases for LED and display arrays (192+ MPixels)! Casinos, stadiums, command and control, huge retail signage, all now possible with the RCU300!

Analog Way's integrated solution

Analog Way gives you all the tools you need to integrate cutting edge image processing technology into large scale video wall projects: Control and manage upstream matrix switchers, create network commands and macros to control any device in the system, remotely launch RCU300 tasks from an automation system… All the tools you need to flexibly and creatively integrate the solution that your customer has envisioned!
