TAURI

#tauri

To ensure people that access your property are not running a high temperature, Glory Star has developed the new Infrared temperature sensor/detector. It provides alerts when a person runs a high temperature, therefore should not enter your premises.

Quick results

Results of measurement are generated within 1 second

High Accuracy

Possible error of the measurement is +/- 0.3 degree Celsius

Hygienic

No touch interaction is required, reducing infection risk

Temperature Detector

The system is calculated with an algorithm for object heat and fast detection temperature accuracy, tolerance

at +- 0.3 degree Celsius, with a refresh rate at 64Hz. The drivers are compatible with Linux, Windows and Android.

Stands for Installation

TAURI is VESA Standard and can be deployed anywhere with our tablet stands and wall mounts creating a complete solution at ease.

German Made Sensors

All sensors used are developed in Germany and tested rigorously for quality assurance.

TAURI Application

An integrated application is embedded into TAURI, providing clear and simple interactive user interface and experience. It is easy to use and no extra installation is required.

Over The Air Updates

Newly developed features can be updated to Tauri's with one click.
